

1. In Router activities, which parameter is needed to make it available to Flow shape Router

Ans: AssignTo

2. Which of the following method is used for viewing any step page's info in XML format (especially for the purpose of debugging)

- a. Show-XML
- b. Show-HTML
- c. Show-Page
- d. Show-Step-Page
- e. Show-Property

3. Which flow shape can be used to call a Map value.

4. _____ flow shape can be used to cancel the Work processing of a flow.

Ans: Ticket

5. Which prefix to a property name indicates that its value can be updated directly by a Worker inputting information through a web form?

- a)ps
- b)py
- c)px
- d)pz

6. List at least 3 PRPC predefined data classes that serve the purpose of work parties

Ans:-

- i. Data-Party-Person
- ii. Data-Party-Org
- iii. Data-Party-Operator
- iv. Data-party-Com
- v. Data-party-Gov

7. The clipboard page which contains information about your access roles, RuleSet list, and HTTP protocol parameters is the:

- (a) Process Page
- (b) Requestor Page
- (c) Thread Page
- (d) User Pages

8. Which of the following is true about step pages. (choose 2)

- a) Steppages define the default pagecontext during the step execution.
- b) Step pages are removed when the activity ended
- c) Steppage class is always equal to AppliesTo Key.
- d) StepPage is not required on each step of an activity.

9. which are true about pegaRULES database.(Choose 2)
- a. Standard and customer created rules are saved in PEGARULES.
 - b. Database cache optimizes worklist items
 - c. DataBase Cache optimizes reading values.
 - d. Pegarules database can not be accessed by external reporting tools.

10. where can we specify new workobject harness .
- a) NewDefaults
 - b) Model.
 - c) FlowRule.
 - d) Harness.

11. choose 3 from property's of assignment flow shape.
- a) Local action
 - b) Routing Activity
 - c) Valid Connectors
 - d) Service level rule
 - e) Assignment activity.

12. For System architect after estimating the ROI and successfactors what is the Step to do next (Check this)

develop test plans and results
assist business presentation
Financial validation
Run seizing tool

13. in rules by type under security tab what are rule- and data- classes.
- Privilege
Application
Accessgroup
When (asked to choose 2 but here 3 are correct)

14. rule-parse-xml does(choose 2)
- each parse xml rule contains set of parsing instructions
XML message mapped to clipboard properties
Rule extracts the data between delimiters

15. utility shape is placed on flow and in properties box on leftside you should specify the rule.
How the smartprompt filter knows which activity type it is.
Ans: In Security tab activity type set to utility

16. elobaration phase deliverables
- Ans: Use-case Package

17. which is used to define gadget layouts anchors
- Ans: portal

18. when login with work user, what he can do using clipboard
- Ans: he doesn't have access to clipboard.

22. what can we place in a model (choose 4)

Ans: Property reference
Literal
Function
Boolean expression

23. what does a privilege do exactly.

Ans: Restrict users to accessing classes.

24. A user can generate reports using

- a. Rule – Obj- ListView
- b. Rule – Obj- Report
- c. Rule – Obj – SummaryView
- d. Rule – Obj- Table

25. The clipboard page which contains information about your access roles, RuleSet list, and HTTP protocol parameters is the:

- (e) Process Page
- (f) Requestor Page
- (g) Thread Page
- (h) User Pages

26. For the report generation to expose the embedded properties in the database what do we require?

- a. Report wizard
- b. Declare Index
- c. Top level property
- d. Concrete Class

27. If your Assignment shape uses the standard rule “Worklist”, and your Router uses the standard rule “ToWorkbasket”, what happens?

- (a) The flow will not save
- (b) The flow will be suspended
- (c) The flow will save, but an execution Java exception will be raised
- (d) The flow will be suspended, and control will be transferred to the FlowProblems flow

28. What is the class of the top level clipboard page created by the Obj-List method?

- (a) Code-Pega-List
- (b) Rule-Pega-Obj
- (c) pxResults
- (d) The same class as the returned instance

29 . When a Manager is creating a list view report to generate on Sales what would he require?

Ans:

- e. Criteria
- f. Data Source
- g. Fields

30. Re Customization of Architecture is done in? (Choose Three)

- a. While collecting the requirements in the conception phase

- b. In the Elaboration phase
- c. While collecting the details of another project
- d. Before starting of the construction phase

31. Where do we find a Non-numeric subscript?

- a) Java Object
- b) Page group
- c) Value list
- d) Page list

32. Which tool is used by the user to check for the Parameter values in the flow?

- a) Parameter Page
- b) Rules Inspector
- c) Tracer
- d) Clipboard

33. What is true about Embedded Pages? (Choose Two)

- a) They are Top level Pages
- b) They can contain details of work object
- c) They are inherited from Data- and work –
- d) They are not top level Pages

34. A property Account Status is called in an Activity belonging to some other class, A page Count belonging to that class is called in Pages and Classes tab which is also specified in StepPage. When this Step is called by Activity, how do you call the AccountStatus.

- a. .AccountStatus
- b. Count.AccountStatus
- c. StepPage. AccountStatus
- d. .accountstatus
- e. Primary. AccountStatus

35. UML diagram was given and the relation between two classes was asked.

- a) One-to-many
- b) Many-to-many
- c) Many-to-one
- d) One-to-one.

36. In rule resolution what are all considered. choose 4

Circumstance,
Ruleset,
RuleSet Version,
Create Date Time,
Rule Availability.

37. for creating tabbed look, which rule is considered.

Flow action,

Section,
Property,
Harness

38. standard work party classes(choose 3)

Data-party-Gov
Data-Party-Person
Data-Party-company
Data-Party-com

39. Examination questions if answered 90-100 Grade A, 70-90 Grade B, 50 -70 Grade C. What are the possible rules which can be used to achieve this (Choose Three)

- a) Decision Table
- b) Map value
- c) When
- d) Declarative Expression

40. Using Rules Inspector, which of the following can be identified (Select all that apply)

- e) Flow rules
- f) HTML rules
- g) Property rules
- h) When Rules
- i) Declarative Rules
